## DEFINITE SPLIT OCCURS REPUBLICAN IRISH ARMY

### United States Demands Full Payment for Services on Rhine

#### ALLIES INSTRUCTED THAT UNITED STATES MUST BE REIMBURSED

(By Associated Press)  
PARIS, Mar. 22.—The American note regarding the payment of costs of the army of occupation in Germany, addressed to European allies, reached the American embassy here yesterday and will be presented to the allies today. The note sets forth the American attitude in a clear and forcible term.

(By Associated Press)  
WASHINGTON, Mar. 22.—Notes identical with that received in Paris from the American government from the presentation of the allied representatives there, are being submitted through diplomatic officials to the governments of Great Britain, Belgium, France, Italy and Japan.

#### BASEBALL COLONY TO BE ABANDONED

(By Associated Press)  
BOYES SPRINGS, Calif., Mar. 22.—San Francisco's baseball colony at Boyes Springs will be broken up when the big city's Pacific Coast league team closes its spring training work here and leaves for home.

The Seals open the season at San Francisco April 4 against Seattle. Between now and the opening date the team will play several games on its home grounds against the Chicago Cubs and several San Francisco semi-professional clubs.

#### RADIOPHONE IS POSSIBLE FOR TONOPAH TOWN

The Elks and the Knights of Pythias are both considering the possibilities of the radiophone with amplifiers as a source of music for their dances and as an entertaining feature of their fraternal work.

Non-Technical Explanation by LETSON BALLIET

The radiophone, or wireless telephone, has swept the country and no other invention has ever done. We have read in the press dispatches of a boy who made a homemade radiophone, set in a cigarbox, with which he could listen in on the messages that were being sent from various stations. He went riding with his father in an automobile, and received the radio messages while enjoying the ride.

The basis of the radio phone is simple. We all know that a pebble thrown into a pond will make a ripple which will spread in rings until it reaches the bank. Likewise a pebble thrown into the ocean makes rings that spread out in exactly the same way, until they go entirely around the earth. It is true that wavelets from the pebble grow smaller and smaller, until you cannot see them with the eye, but nevertheless they are there. On the same principle if you clap your hands or fire a gun or if the wind blows, it sets up rings of air waves, or vibrations of the air in exactly the same way that the waves of water pass in rings from the pebble in the pond. These rings in the air pass clear around the world, but grow smaller and smaller, the farther they go, until they have grown so weak that they don't cause the ear drum to vibrate sufficiently to convey the vibration to your brain. Thus, you say, you do not hear the vibrations.

The phonograph was invented upon the basis of a person's voice making air vibrations which were transmitted to the ear. By transmitting these air vibrations to a diaphragm, and recording them upon a wax cylinder, Mr. Edison was able to put the wax under a needle and thus put the vibrations back into the air just the same as the original voice made it vibrate. Thus, any time you wish you can put on a record, and set the air to vibrating with the same vibrations that the person making the record did with his voice. Then you say you "hear" the vibrations. With all this in mind, it was necessary only to find some method of increasing the pressure of these tiny air waves that are going around the world. An "amplifier" was invented which can be likened to an electric transformer which takes electric vibrations at a low voltage at one side and sends them out at a much higher voltage, or pressure, on the other side. This

#### Armistice Proposed for Greeks and Turks

(By Associated Press)  
PARIS, Mar. 22.—Allied foreign ministers, convened here for the consideration of the near eastern situation, sent telegrams to Constantinople and Athens proposing an armistice between the Greeks and Turkish Nationalist army facing each other in Asia Minor.

#### Preliminary Hearing Radomovich Tomorrow

The preliminary hearing of Ell Radomovich, charged with assault with intent to kill, will be held tomorrow morning at 10 o'clock before Justice Cuddy. Defendant is represented by Attorney J. G. Thompson.

Maximum yesterday...43 36	

#### COLLEGE STUDENTS ENTER ON STRIKE

(By Associated Press)  
CALCUTTA, Feb. 12.—(By Mail.)—Students of four colleges here have gone on strike as a protest against the present policy of the government in dealing with the natives.

At Lahore, congress volunteers have picketed the shops of dealers in foreign cloths.

The district magistrate of that city has forfeited the security of 2,000 rupees paid respectively by the publishers of the Siasat and Akali newspapers. These actions have been taken under the press act.

#### STRENGTH NAVY DECIDED UPON IS 80,000 MEN

(By Associated Press)  
WASHINGTON, Mar. 22.—The house naval committee agreed today to report the bill fixing the maximum authorized enlisted strength of the navy at 80,000 plus 6,000 apprentices, or 10,000 less than Secretary Denby declared was needed to operate the treaty fleet. The bill also provides that not over 200 members of each graduating class at the naval academy shall be commissioned for the year 1923 and 1924.

#### CRIME CLASSED AS REFLECTION OF CHARACTER

(By Associated Press)  
CHICAGO, Ill., Mar. 22.—The importance of feeble-mindedness as a source of crime has been over-rated, according to the committee on origin of crime of the Chicago crime commission. Intelligence tests similar to those used in the army are declared by the committee to indicate that the level of intelligence among first offenders is not greatly different from that which prevailed among drafted men during the World War.

Holding that "crime is a reflection of character," rather than of mentality, the committee renews recommendations that as a preventive, clubs for boys and girls, supervised by leaders "who are most capable of understanding youth," be distributed in regions where they are needed.

The committee also finds that offenders who have been imprisoned four or more times compose "one-third of the total prison population." It recommends an act "whereby one who has been four or more times convicted and sentenced, for any misdemeanor even, may be committed for from one to three years," and the commitment of mental defectiveness among such repeaters to appropriate institutions.

#### MYSTERY SURROUNDS DEATH TWO PERSONS

(By Associated Press)  
SALT LAKE CITY, Mar. 22.—Mystery surrounds the deaths of Charles Bradford and his nephew, George Bradford, found shot and killed, six miles east of Monticello in southeast Utah, on Monday, according to word received here. The men were on their way home to the ranch after a business trip to town when they were shot.

#### DEPORTEES ESCAPE FROM U. S. OFFICERS

(By Associated Press)  
SEATTLE, Mar. 22.—Five men held for deportation by the federal immigration authorities, escaped from the United States immigration detention station here last night. They piled apart the bars of a window leading to the fire escape. None of over 40 Japanese in a room with the men attempted to escape with them.

#### PERMANENCY OF ORE VEINS MT. ODDIE ASSURED

Increasing interest is manifest in properties on the east side of Mount Oddie, since development in the Halifax mine has proven the magnitude and permanency of the ore veins. The eastward trend of these veins has pointed to the great possibilities of the large territory surrounding that property which has proven the orebodies to be extending into virgin ground.

Now comes the information, that the Tonopah East End Development company will absorb the Tonopah Independent property adjoining the East End on the south and will sink the independent shaft as the main working shaft.

Some years ago the East End shaft, which has a depth of about 450 feet, encountered a heavy flow of water, making sinking expensive. The formation, dipping as it does to the north, brought all the water into the shaft from the south. The strike of the veins to the eastward indicates that the independent shaft will go down almost on top of the veins, providing they continue unchanged in their course. Moreover, if the dip to northward correlates with the veins of the ore zone farther west, these veins will probably be encountered nearer the surface in the independent than in the old shaft of the East End, with less water to pump, if any. Both shafts are about the same depth.

The consolidation of these two properties puts the united acreage of virgin ground in a most advantageous position, and will prove interesting to capital for extensive development. Other east side properties will be benefited by the extended operations.

#### MINERAL FINDS AT HORNSILVER SPELL SUCCESS

Visitors to Hornsilver are becoming more and more impressed with the wonderful showing at the Orlean mine. The big ore dump which has been accumulating in the course of development, now measures in the neighborhood of 1500 tons and does not fail to have its significance.

The camp is increasing rapidly in population, largely by the incoming mining men from outside sections. Reno and Los Angeles have contributed generously in this behalf. Splendid reports are coming from all parts of the district and available locations are becoming more and more limited. Ground, however, is still to be had. Any one who will "dig" and hustle may discover the biggest mine of the district.

With the advent of warmer weather and better roads the enthusiasm in the camp is becoming more and more pronounced.

At a public meeting held at the camp a few days ago, some 60 citizens volunteered to put the old telephone line from Goldfield to Hornsilver in good working order. Arrangements have been made with the telephone company and the line will be opened during this week.

Unusual local interest is being manifested in Hornsilver and Fenwick & Company report that some 60 odd visitors visited their office yesterday to look over their display of specimens from different sections of the district.

#### Underwood Believes That Treaty Will Be Ratified

(By Associated Press)  
WASHINGTON, Mar. 22.—Confidence that the four-power Pacific treaty will be ratified by the senate was expressed by Senator Underwood, Democratic leader, on leaving the White House after a conference with President Harding.

#### HEPBURN COURSE FOR IMPERIAL COLLEGE

(By Associated Press)  
TOKIO, Feb. 23.—(By Mail.)—A special course of study to be known as the Hepburn course, is to be established at the Tokio Imperial University for the benefit of students aspiring to study constructional development and diplomacy. The new course will be under direction of Prof. Yasaka Takagi, who is expected to return from the United States in the near future. It is founded on donations made by the late American banker, A. B. Hephburn, who visited Japan recently.

#### GOVERNOR OKLA. IN SAME PLIGHT AS GOV. SMALL

(By Associated Press)  
OKMULGEE, Okla., Mar. 22.—A joint indictment charging Governor J. B. A. Robertson and Fred G. Dennis, former state banking commissioner, with accepting a bribe to permit of the Guaranty State Bank here to continue to do business after it had been found insolvent, was returned by the district court grand jury yesterday. It was learned today by the Associated Press. Sheriff Frank Sowers has the warrant for the governor's arrest, but said he expected to hear from the chief executive some time during the day, and that he did not intend to serve the warrant until today.

#### THREE ARRESTS IN CONSPIRACY DEFRAUD U. S.

(By Associated Press)  
LOS ANGELES, Mar. 22.—The government probe of what was expected to reveal a far reaching conspiracy to defraud the government in obtaining war department surplus supplies worth hundreds of thousands of dollars by manipulation of auctions, has resulted in three arrests, and a fourth is pending. Benjamin B. Sugarman, Daniel Greenberg and Joseph B. Isaac, Los Angeles business men, are on bail, and Isaac Greenberg, of San Francisco, is expected to be arrested. Federal officials announced. Daniel Greenberg was auctioneer at the Camp Kearney sale, Joseph Isaac was secretary, which were under the direction of Major Max A. Elser, of the quartermaster's department at Fort Mason, San Francisco.

#### Young Millionaire Held to U. S. Court

(By Associated Press)  
KALAMAZOO, Mich., Mar. 22.—John Duval Dodge, youthful Detroit millionaire, was bound over to the April term of the circuit court today at the preliminary hearing on the charge of illegal possession of liquor, meanwhile the jury trying Dodge on the charge of driving an automobile while intoxicated, was still deliberating.

#### Billie Ford Is Friend of Real Old Friend

Billie Ford, best known Celestial in southern Nevada, and who took up his residence at Candelaria over 40 years ago, has asked the Bonanza to print the following touching upon the integrity of his old friend "Billie" Douglas:

"I have known 'Billie' Douglas for 40 years. He never does anything wrong. No matter how little he's not he is always willing to help anybody that goes to him for help. He is the squarest and most honest man I know. Anybody that does dealings with him would not have to do it in black and white."

(Signed) "BILLIE FORD."

#### MAJORITY OF ARMY BELIEVE THAT DAIL EIRMANN TO BE FALSE

#### ATHLETIC FIELD OF OREGON DEVELOPED

(By Associated Press)  
EUGENE, Ore., March 22.—Development of the University of Oregon's extensive athletic field on the university's 35-acre tract has been receiving the attention of the coaches and John F. Bovard, dean of the school of physical education. Dean Bovard will include in his budget for the coming year provision for draining the tract, just below Hayward Field, which will be the first step toward bringing about realization of the pretentious plan.

#### BUCKEYE MINE WILL RESUME DEVELOPMENT

The Buckeye mine is planning to start work. This company has the very strongest kind of backing, and during the panic of 1907 when many other companies were closed down, it continued its development. During the war the property suspended and it was not until last fall that the company began to prepare for reopening. During the cold weather the management thought it best to allow the property to remain following to the fact that the Buckeye shaft is downcast, and bulkheading the shaft for any repair work would work a hardship upon some of the neighboring mines which would be deprived of the air current for ventilation.

Several attempts have been made to obtain leases upon the Buckeye, but two of them balked at the clause of "no ore can be taken out by undermining from adjoining properties."

The Buckeye has cut ore in several places and since 1914 has been in the ore formations. Assays have shown values from \$18 to \$35, but no publicity has ever been given to this, and it has never been the policy of the company to make a market for its shares.

The following was published in the Bonanza, on December 1st, 1914, which shows that ore-bearing formations were known to the Buckeye management long before the present development in adjoining mines disclosed that fact:

"A discovery of the utmost importance to the future development of Tonopah has been made in the eastern territory by which the mineralized zone has been extended indefinitely eastward. The find is due to the work of the Buckeye Belmont, which has demonstrated that the rhyolite barrier intruded in such a way as to appear to block all further realization is nothing more than an intrusion of rhyolite through an enormous crevice. After passing through this barren zone for a distance of 600 feet the trachyte was picked up and there is every promise that in this formation some of the rich ledges found west of the rhyolite will be opened and several good producers brought into bearing."

The value of the find cannot be overestimated as it is pregnant with the utmost significance to the mining area of Tonopah, as it will extend the mineralized district to an unknown distance east of the present producers represented by the Halifax as the outpost.

"Heretofore frequent reference to the trachyte formation of Tonopah have stated that 'on the east side of Mt. Oddie the trachyte dipped sharply and passes under the rhy-

According to Commandant Roderick O'Connor, director of engineering of the headquarters staff of the Irish Republican army, 80 per cent of the army's members believe the army has been "let down" and that the Dail Eireann has been false to the Republican oath by agreeing to accept the inclusion of Ireland within the British empire.

(By Associated Press)  
LONDON, Mar. 22.—The situation on the border between Ulster and southern Ireland is going from bad to worse, and is such that some trifling incident may draw the rival forces into conflict, which will shatter all prospects of peace in Ireland, says the Dublin correspondent to the Times. "The tragic irony of the situation," he adds, "consists in the fact that a vast majority of Irishmen of all parties deplore the danger, but seem unable to avert it."

(By Associated Press)  
BELFAST, Mar. 22.—Desultory firing continued all day yesterday from the Free State side of the border along the frontier counties of Tyrone and Monaghan between Aghnacloy and Caledon, mostly from snipers in houses inside the boundary line, according to reports from the border.

Two families in the danger zone moved their entire effects to a safer place in the Tyrone county interior in consequence of their farmhouses being riddled by bullets. When a farmer in the Caledon district moved out, the house was immediately occupied by snipers. The police report that snipers are evidently good marksmen and possess up-to-date field glasses, judging by the prompt way they spot movements of opposing forces. Large bodies of police have been moved to the district, thus reassuring the Loyalists to some extent.

(By Associated Press)  
LONDON, Mar. 22.—The British government may have to consider whether it may be possible to draft the cordon of imperial troops between the warring elements on the Ulster frontier, Winston Churchill, colonial secretary, stated in the house of commons.
